

Explore a Career as a

MAINTENANCE WORKER, MACHINERY

What does a Maintenance Worker, Machinery do?

Machinery maintenance workers do basic maintenance and repairs on machines. They clean and lubricate machinery, perform basic diagnostic tests, check the performance of the machine and test damaged machine parts to determine whether major repairs are necessary. All maintenance workers use a variety of tools to do repairs and preventive maintenance. For example, they may use a screwdriver or socket wrenches to adjust a motor's alignment or they might use a hoist to lift a heavy printing press off the ground. Machinery maintenance workers follow machine specifications and adhere to maintenance schedules. They perform minor repairs, generally leaving major repairs to machinery mechanics.

Maintenance Workers, Machinery are in demand in Livingston County!

Livingston County employment of machinery maintenance workers is expected to increase through 2020.

Training & Educational Opportunities

You will have plenty of employment opportunities as a machinery maintenance worker, but first you will have to earn an associates degree.
